Grounded Growth

Two brand colours with fixed jobs, quiet slate neutrals, and status colour that only ever means something. One light theme, one set of tokens, used by every screen on desktop and phone.

Navy acts, green grows
Never a green primary button or a navy money figure.

Red is reserved
Only overdue, errors and delete. Not for emphasis.

No pure black
Text tops out at Label #0F172A.

Muted is not text
If someone must read it, it is Caption or darker.

Type

Plus Jakarta Sans for titles and numbers people glance at. Inter for everything people read. Weight carries hierarchy; size steps down once on phones.

Two faces

Aa 128

Plus Jakarta Sans 600–800. Page titles, headings, card titles, KPI numbers. Never body copy.

Aa 128

Inter 400–700. Body, labels, inputs, buttons, tables, badges.

Rules

Figures are tabular, always. Money, counts, dates and phone numbers line up in columns.

Indian grouping. ₹12,48,500, not ₹1,248,500.

Nothing below 11. Buttons 14/600, compact 13/600.

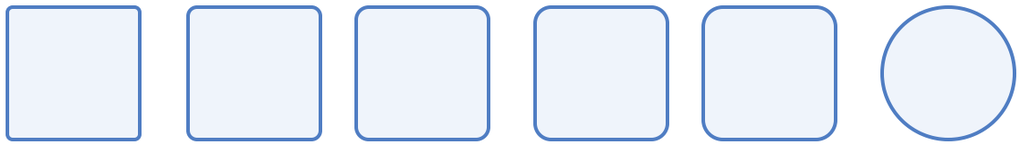

Sentence case everywhere except overlines.

Shape, space & depth

A 4pt grid, shallow corners that keep the product feeling like software, and elevation that only floats what really floats.

Shape

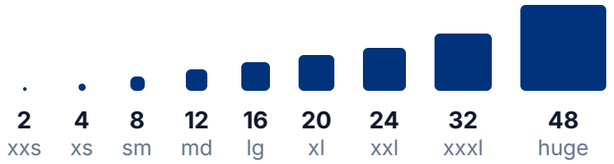

Controls 8 · cards 10 · modals 12

4	6	8	10	12	Full
Bars, swatches	Badges, chips	Buttons, inputs	Cards, tables	Modals, sheets	Avatars only

Space

xxs	xs	sm	md	lg	xl	xxl	xxxl	huge

8 between related items · 12 between rows · 16 card padding & phone gutter · 24 desktop gutter · 32 between sections

Depth

Flat and bordered by default. Shadow = it floats

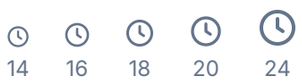

Canvas	Card	Hovered card	Menu, popover	Modal, sheet
#F1F5F9, no shadow	1px border, no shadow	sm · 0 2 6 · 6%	md · 0 6 16 · 8%	lg · 0 12 32 · 12%

Sizing

120	200	320
ms · hover, press, toggles	ms · expand, tab switch	ms · sheets, modals

Quick and never showy. No bounce, no parallax.

Components

The building blocks every screen is assembled from. If a screen needs something new, it is made from these tokens first.

Buttons

40h · radius 8 · 14/600

+ Record sale | Export | Cancel | Delete | Saving...

Save | Edit | Compact 32h · 13/600 · table rows, dialog footers

One primary per view. Destructive actions confirm in a dialog first.

On the phone

Same tokens, rearranged. The sidebar becomes a bottom bar, tables become cards, dialogs become sheets, and every target grows to a thumb.

< 768
Phone · bottom bar · 16 gutter

768–899
Narrow · sidebar · single-pane detail

≥ 900
Wide · two-pane detail · 24 gutter

Bottom bar, five at most
Green 800, 62h. Dashboard, Sales, Chats, Clients, More. Profile moves to the app bar.

Tables become cards
Name and one line of context left; one number and one status right. Everything else is in detail.

Dialogs become sheets
Forms rise as bottom sheets, radius 12 top with a drag handle. Short confirms stay dialogs, inset 12.

Thumb-sized targets
44pt minimum. The main action is full-width 48h at the bottom, within reach.

Type steps down once
Page title 32 → 24, metric 28 → 24, heading 22 → 20. Body and labels stay the same.

One column
Form fields stack. KPI tiles go two-up. Nothing scrolls sideways.

Landscape is still a phone
On Android and iOS, a shortest side under 500 keeps the phone layout even when the width passes 768.

Respect safe areas
The bottom bar and sheets sit above the home indicator; nothing hides under the notch or status bar.

Sidebar on wide screens
Green 800 → 900 gradient, 216 wide, collapses to 80 icons-only. Same destinations as the bottom bar.

Press, don't hover
Touch has no hover: every state a mouse user sees on hover must also exist as a pressed or selected state.
